---

## Summary

Frontend Engineer with experience building responsive web applications using React, Next.js, TypeScript, and Tailwind CSS. Built multiple full-stack and UI-focused projects, including healthcare, food-sharing, and product-discovery platforms. Comfortable working with Node.js, Firebase, MongoDB, and CI/CD workflows.

## Education

### BSC in SWE

DAFFODIL INTERNATIONAL UNIVERSITY

July 2023 – Present

## Additional Skills

**Programming Language:** c, c++ , Java, JavaScript, TypeScript, Python

**Frontend Engineering:** React, Next.js, TypeScript, JavaScript (ES6), HTML5, CSS, Tailwindcss, Shadcn/ui component library, DaisyUI

**Backend & Data:** Node.js, Express.js, Postgres, MongoDB, MySQL, OAuth, JWT

**Cloud & Infrastructure:** Firebase, GitHub Actions, npm (Node Package Manager), VS Code

**Core Competencies:** Building B2B Products, FP&A Systems Architecture, Problem Solving, CI/CD Automation

**Languages** • Bangla - Native or Bilingual Proficiency • English - Full Professional Proficiency

## Projects:

### Professor Dr. M. Amjad Hossain Website

Developed a healthcare website with Next.js, React, and Tailwind CSS that enables appointment booking and showcases services.

**Tech Stack :** Next.js|React.js|TailwindCSS|TypeScript

#### Live Demo: Visit Project

**Github Repo:** <https://github.com/nur21horin/website-redesign>

### CodeShare – Social Code Sharing Platform

Developed a full-featured developer community platform using Firebase Auth, Firestore, Tailwind CSS, DaisyUI, and Framer Motion, adding search, pagination, and image compression.

#### Live Demo: Visit Project

**github frontend:** <https://github.com/nur21horin/codeShare>

**github backend:** <https://github.com/nur21horin/codeshareBackend>

### Lonify – Loan Management System

Built a role-based full-stack loan management platform with loan browsing, applications, repayments, product management, and admin/user control features using React, Vite, Firebase Authentication, Node.js, Express.js, MongoDB Atlas, and JWT.

#### Live Demo: Visit Project

**github frontend:** <https://github.com/nur21horin/Lonify>

**github backend:** <https://github.com/nur21horin/Lonify>

### Sushi Shop:

Modern, responsive web application showcasing a sushi restaurant. Features interactive menu, engaging UI elements, smooth navigation.

Technologies: HTML, CSS, JavaScript

#### Live Demo: Visit Project

**Github\_repo:** [https://github.com/nur21horin/Sushi\\_Themed](https://github.com/nur21horin/Sushi_Themed)

**PlateShare – Food Sharing live:** MERN-based community food-sharing platform. Features: donate surplus food, request items, manage contributions, reduce food waste. Includes authentication, dashboard features, and fully responsive UI.

Technologies: React, Node.js, Express, MongoDB, Firebase, TailwindCSS, DaisyUI, Auth

#### Live Demo: Visit Project
